3M™ 2135
Particulate Filter P3

Suitable for use with

All 3M 6000 Full Face Masks

All 3M 6000 Half Masks

All 3M 7500 Half Masks

Typical Applications

The 2135 filter has been classified as a P3 particulate filter, and is thus able to be used for protection from mechanically and or thermally generated particulates i.e. it provides protection against dusts, mists and fumes, as well as for toxic materials like beryllium.

DESCRIPTION

3M™ 2135 Disc Filter P2/P3 Particulate is one of the 3M 2000 series of filters that provide a lightweight filter option for 3M™ Half and Full Face respirators. Disc Filter 2135 can be used in industries where excess levels of
particulates are present in the workplace atmosphere.

FEATURES

Bayonet Fitting
Ensures precise & safer locking.

3M High Performance Filter Media
Advanced Electret Media for maximal filtration efficiency & is lightweight. Lighter than conventional filters that provide comparable protection. Low breathing resistance.

Versatile
Can be used on all 3M 6000, 3M 7000 & 3M 7500 Series Half Masks & Full Face Masks.

Efficiency and Protection Factor
The 3M 2135 Disc Filter provides P3 protection only with full facepiece respirator. Provides P2 protection with half facepiece respirator. Durable, water-resistant & flame retardant.

Packaging

- 20 x Units per Box
- 4 x Boxes per Case

3M™ Fit Test Kits
Fit-testing is a method of ensuring an initial good fit for respiratory protection.
